**Comment about the Fan-Shop-Product relation:**

We choose the empty diamond, because we thought the Fan-Shop can exist even if there are no products at a moment, for example if an admin just deleted the last product but new ones will be added soon. On the other hand, we know that a Fan-Shop's most important role is to contain oducts, so we would also understand if someone would argue that it cannot exist without products. In this case, the diamond would have to be filled out.
